

IIPCIC Data Security breach reporting process
May 2018

Unless the personal data breach is unlikely to result in a risk to the rights and freedoms of natural persons, the GDPR requires that the controller shall notify the breach to the ICO without undue delay and, where feasible, not later than 72 hours after having become aware of it. A controller should be regarded as having become “aware” when that controller has a reasonable degree of certainty that a security incident has occurred that has led to personal data being compromised.
